CSS

Sass **SASS**

MySQL & MongoDB

git & GitHub

Gatsby/JamStack

EDUCATION

B.E. in "Computer Science & Engineering"

Aug 2015 - May 2019
CGPA : 8.05
University : R.G.P.V., Bhopal
College : Jai Narain College Of Technology, Bhopal

12th

July 2014 - March 2015
Percentage : 71%
Certificate : I.S.C.

10th

July 2012 - March 2013
Percentage : 81.16%
Certificate : I.C.S.E.

School : Fatima Convent H.S. School, Nagda

PROJECTS

Amar's Portfolio (Oct 2020 - Jan 2021)

A portfolio site which exhibits a Home Page with a brief intro to who I am, a Technologies Page with detailed list of Technology Stack & tools that I use & my skill level in those techs and a Project Page which displays various personal projects that I've worked on in past or I am currently working on. Deployed on Netlify, this site itself shows off my skills in developing responsive sites using modern progressive web technologies such as JamStack.
Stack : JamStack, Gatsby, React, Javascript, FontAwesome

Microblog UI (Feb 2020 - Present)

A react based Single Page Application that uses Microblog RestAPI as backend. This application has features such as creating & deleting post, login/logout, account creation, email verification using otp, reset password, user profile, profile image upload with cropping while upload, edit profile, change password, follow/unfollow other users, etc. This app doesn't need to open a new page for every user action because it uses rest api for that.
Stack : JavaScript, React, Redux, Redux-Thunk, SemanticUI, MomentJS

Microblog (Nov 2019 - Feb 2020)

A multipage microblogging web app made using Flask Framework with following features: Authentication, User Profile, Post Creation & Deletion, User Follow/Unfollow & a ReST API which one can use to create custom frontend.
Stack : Python, Flask, SQLAlchemy, Jinja2, JavaScript, SemanticUI, MomentJS

REST API

GraphQL API

🅱 Bootstrap

SemanticUI

D3

Webpack

Babel

Firebase & Firestore

🐳 Docker
